

# Office seating

## Features and Benefits

# Furnishings for the office environment

## Office furniture

Sedus office furniture systems are ideal for designing every type of office – from individual workstations to team settings and open-plan offices, to flexible benchworking. The desking ranges are complemented by storage unit systems and mobile pedestal solutions.

## Office seating

Sedus office chairs fulfil two essential functions: they are “tools for work” and interior design features in one. Sedus office chairs are made exclusively to order – individually tailored to your requirements.

## Conference furniture

Furnishing conference, seminar and meeting rooms – static and elegant or mobile, dynamic and flexible – is a Sedus speciality. Form, function and ergonomics in perfect harmony.

## Break-out furniture

Canteen, meeting point, break-out area, or waiting and reception areas – Sedus break-out furniture utilises space efficiently and stylishly. With maximum functionality and diverse designs.

## Features

## Benefits

---

### Seat mechanism

- > “Similar” mechanism with patented quick adjustment feature; optional seat tilt adjustment (4°)

- > Using one hand, you can immediately adjust the tension to suit your weight; the mechanism is easy and intuitive to use

---

### Backrest

- > Backrest with double membrane covering in new, patented fabric (Wovenit), a special fibre with memory effect
- > The backrest is ergonomically shaped with integrated lumbar support (70 mm height adjustment)

- > Double membrane ensures perfect distribution of pressure when you lean back. It is tactile, easy to clean and maintain with optimum support from the elasticity of the memory effect of the material
- > The forward curvature for lumbar support is always in the right position

---

### Seat

- > Anatomically formed with smoothly rounded front edge
- > Height adjustment with mechanical depth springing
- > Depth adjustment (60 mm adjustment range)

- > Always a correct sitting posture and a secure support; no unconscious sliding forward; rounded front edge to prevent constriction of blood flow
- > Full absorption of body weight even in the lowest sitting position; no jarring of the spinal column
- > The correct sitting position for tall and small users alike

---

### Armrests

- > Height-adjustable; 3D adjustable (height/depth/width)

- > Optimal support for the forearms; helps prevent tension in the shoulder and arm muscles
-

## Characteristics

With netwin, everything sits well – the design, the finish, the ergonomics. And all for a price which will make your transition to Sedus quality seating smoother. Visually and functionally netwin fits in equally well into any surroundings: with the breathable backrest membrane available in seven different colours and three variations on the model, designing any space is a breeze – and customizing netwin for multi-user workstations is just as easy.

## netwin product family

Task chairs, 4-leg and cantilever models

## Features

## Benefits

---

### Seat mechanism

- > "Similar" mechanism with patented quick adjustment feature; optional seat tilt adjustment (4°)

- > Using one hand, you can adjust the mechanism on the spot to suit your weight; the new setting can be felt straight away

---

### Backrest

- > Perfectly shaped backrest with adaptable slat structure; comfortable upholstery with streamline silhouette, precise cut and stitching; integrated lumbar support (80 mm height adjustable), can be set easily by user

- > The slat structure guarantees optimal pressure distribution when you lean back, outstanding support and good sitting comfort. Tangible first-class workmanship creates a further sense of wellbeing; curvature of the lumbar support is always in the correct position

---

### Seat

- > Anatomically formed with smoothly rounded front edge
- > Height adjustment with mechanical depth springing
- > Depth adjustment (60 mm adjustment range)

- > Always a correct sitting posture and a secure support; no unconscious sliding forward; rounded front edge to prevent constriction of blood flow
- > Full impact absorption of body weight even in the lowest sitting position; no jarring of the spinal column
- > Excellent sitting comfort whatever your height

---

### Armrests

- > Height adjustable; 3D adjustable (height/depth/width)

- > Optimal support for the forearms; helps prevent tension in the shoulder and arm muscles

## Characteristics

Sedus match stands for quality and performance at a great price. The streamline silhouette gives Sedus match its unmistakable character. The perfectly shaped backrest with its adaptable slat structure, its gentle flexibility and the generous upholstered seat ensure outstanding sitting comfort. The large selection of fabrics and the option of a non-upholstered backrest further enhance the design diversity. Thanks to the patented quick adjustment feature, the backrest pressure can be reliably adapted to the user's weight with just one hand movement – ideal for multi-user workstations.

# match up

## Characteristics

match up scores the ultimate match point – in terms of ergonomic quality, aesthetics, performance and an unbeatable price. Making it the true all-rounder for every situation: be it high-concentration work in the back office, heated debates around the team table or in its classical role as a multi-user office chair.

Thanks to the patented Sedus “Similar” mechanism, every single adjustment requires little more than the flick of a wrist.

And when the pace of work begins to heat up, you’ll find just the adjustment you need – e.g., depth-adjustable lumbar support, adjustable seat depth or head rest.

## match up product family

Swivel chairs, 4-leg and cantilever models

## Features

## Benefits

---

### Seat mechanism

- > "Similar" mechanism (innovative quick adjustment feature); optional seat tilt adjustment (4°)

- > Using one hand, you can immediately adjust the mechanism to suit your weight; the new setting is easy to feel

## early bird

### Characteristics

Can good design put you in a good mood? The welcoming appearance of early bird provides the answer.

The open, balanced styling reflects its functional qualities – early bird is technically advanced, mechanically durable and the product of high-quality craftsmanship. Ergonomically, early bird offers exceptional comfort for anyone who works a lot sitting down. What's more, early bird simplifies the job of furnishing an office because it comprises a highly functional and good-looking range for every type of use.

# black dot

## Characteristics

black dot has a stimulating effect in every sitting situation. The dorsokinetic backrest and the new, breathable and moisture-permeable upholstery provide maximum freedom of movement and create a real feel-good factor. The design of black dot is equally outstanding. Its elegant lines, colour concept and attention to detail give any room its own individual character – as a stand-alone chair or as a team comprising swivel chair, 4-leg model and cantilever. In a word: black dot is a milestone in the new emotional office culture.

# open mind

## Characteristics

open mind embodies the Sedus concept of dynamic sitting – with no compromises. The eye-catching central feature of open mind is the integral back frame and backrest support – with a choice of semi-transparent, breathable membrane covering or fabric or leather finish.

The striking design of open mind is complemented by its exemplary ergonomic qualities: the large opening angle (over 32°) permits maximum freedom of movement and a comfortable sitting-lying posture for relaxation.

## open mind product family

Swivel chairs, cantilever, ottoman

Features	Benefits
<p><b>Seat mechanism</b></p> <ul style="list-style-type: none"> <li>&gt; “Similar” mechanism (opening angle of up to 45°) moves in complete synchronism with your body; optional seat tilt adjustment (4°)</li> </ul>	<ul style="list-style-type: none"> <li>&gt; Maximum freedom of movement and comfort; natural relief for muscles and intervertebral discs; an almost horizontal working posture is possible</li> </ul>

# open up

## Characteristics

With an opening angle of up to 45°, open up redefines freedom of movement in the office. Another special ergonomic feature of open up is the flexible backrest connection – the dorsokinetic mechanism. It means that the backrest adapts directly to all your rotational, sideways and backward movements. The large opening angle permits an almost horizontal working posture – ideal for relieving strain on the spinal column and for relaxing (power napping). As unusual as its gracefully slender design is the integral concept of open up, which includes an ottoman and also a work assistant.

## open up product family

Swivel chairs, partner chairs, cantilever models, work assistant, ottoman

## Features

## Benefits

---

### Seat mechanism

- > “Similar-Plus” mechanism with preselectable backrest opening angles (0°, 11°, 22° or 32°), optional seat tilt adjustment (4°)
- > Patented quick adjustment feature of the backrest pressure
- > Both the seat and the backrest move synchronously with your body

- > Maximum freedom of movement and comfort; natural relief for muscles and intervertebral discs; activates the natural metabolic processes
- > Using one hand, you can adjust the mechanism to suit your weight
- > Continuous support of the hip bone area; prevents the “shirt-pulling” effect

---

### Backrest

- > Backrest with load-bearing support structure and mobile, flexible upholstery
- > Height-adjustable lumbar support (60 mm)
- > Fully integrated headrest

- > Backrest responds to, though doesn't control, the backbone movement
- > Optimal pressure distribution when you lean back
- > Supports neck muscles when upper body is far reclined, a comfortable sitting-lying posture is possible

---

### Seat

- > Comfort pocket, generously and softly upholstered
- > Seat height adjustment (patented Sedo-Lift mechanism)
  
- > Depth adjustment (50 mm) with return function

- > Always the correct sitting position and secure support
- > Durable, wear-free mechanism; full impact absorption of body weight even in the lowest sitting position; no jarring of the spinal column
- > Sitting comfort for all sizes, seat always well positioned

---

### Armrests

- > 3D adjustable (height/depth/width)

- > Optimal support for the forearms; helps prevent tension in the shoulder and arm muscles
-

## crossline

### Characteristics

crossline stands for a whole new sitting experience. The drive and centre piece of this swivel chair is the patented “Similar-Plus” mechanism, which ensures exceptionally smooth movements for dynamic sitting. Even the “shirt-pulling” effect is practically a thing of the past. The backrest provides ideal support to the hip bone area with its mobile, flexible upholstery, gently absorbs movements of the spine and always maintains contact with the back. The controls are intuitive to use, are easy to reach and feature distinct symbols. That even makes adjusting the settings fun.

### crossline product family

Swivel chairs, partner chairs, cantilevers, 4-leg models

## Features

## Benefits

---

### Seat mechanism

- > “Similar” mechanism (opening angle of 32°)  
moves in synchronism with your body

- > Maximum freedom of movement and comfort,  
including in a far-reclined posture;  
natural relief for muscles and intervertebral discs

---

### Backrest

- > 2 backrest heights with integrated,  
elegantly designed lumbar support height adjustment
- > With headrest in a choice of fabric or leather coverings

- > Optimal pressure distribution when you lean back;  
curvature of the lumbar support is always in the right position
- > Support for the neck muscles when upper body is far reclined;  
comfortable sitting-lying posture is possible

---

### Seat

- > Luxuriously soft upholstery with fabric or leather covering
- > Seat height adjustment (patented Sedo-Lift mechanism)

- > Seat moulds itself to your body’s contours, ensuring excellent long-term  
comfort
- > Durable, wear-free mechanism; full impact absorption of body weight  
even in the lowest sitting position; no jarring of the spinal column

---

### Armrests

- > Integrated in the backrest section

helps prevent tenseness in shoulder and arm muscles
-

# silent rush

## Characteristics

Cool composure characterises the design of silent rush. Exemplary ergonomics and comfort make it a sitting experience. The organic shell shape in combination with the luxurious upholstery brings a new feel to the modern office environment: the comfort of home. The visual elegance of silent rush is unmistakable, right down to the functional details, such as the aesthetic lumbar support adjustment on the rear of the swivel chair. With its feel-good character, silent rush is perfectly at home in any situation – conference room, business lounge or foyer.

## silent rush product family

Swivel chairs, cantilever

## Features

## Benefits

---

### Seat mechanism

- > “Similar Plus” mechanism with pre-selectable backrest opening angle (four stages: 0°, 11°, 22° and 32°)
- > Patented quick adjustment of backrest pressure
  
- > Completely synchronous movement of seat and backrest with the user’s body

- > Maximum freedom of movement and comfort; natural relief for muscles and intervertebral discs; activates the natural metabolic processes
- > Using one hand, you can immediately adjust the mechanism to suit your weight
- > Full surface contact between chair and back throughout entire range of movement

---

### Backrest

- > Ergonomically shaped backrest with forward curvature for lumbar support
- > Integrated headrest with “independent fit technology”

- > Optimal pressure distribution when you lean back
- > When the user leans back, the headrest moves forward gently, providing active support for the natural position of shoulders and head

---

### Seat

- > Anatomically formed seat with seat hollow, hip support and rounded front edge
- > Multi-layered upholstery: moulded foam for support, additional layer of pressure-distributing cut-foam, wadded lining
- > Seat height adjustment (patented Sedo-Lift mechanism)

- > Always a correct sitting posture and a secure support; no unconscious sliding forward; correct hip posture
- > Initial impression – soft; seat moulds itself to your body’s contours, ensuring excellent comfort during extended sitting periods
- > Durable, wear-free mechanism; full impact absorption of body weight even in the lowest sitting position; no jarring of the spinal column

---

### Armrests

- > Integrated armrests

- > Optimal forearm support; helps prevent tension in the shoulder and arm muscles

---

### Panel finishes

- > Attractive panels on backrests and armrests; available in leather, paint, wood veneer or Corian®

- > Look may be tailored to individual requirements; creating perfect coordination with your office environment
-

## Characteristics

of course is a winner – just like its owner. It embodies the ultimate in swivel chair design technology. The ever-increasing importance of correct sitting in the Sedus philosophy is reflected by its innovative “independent fit technology”.

Moreover, of course is a true feast for the senses – whether you focus on the details or on the chair as a whole. The material processing, control and adjustment elements, and the panels in fine veneer, high-gloss varnish or even Corian® emphasise the design’s aesthetic balance – for true appeal.

## of course product family

Executive swivel chair, conference swivel chair

## Features

## Benefits

---

### Seat mechanism

- > “Similar” mechanism (opening angle of 32°) moves in complete synchronism with your body

- > Maximum freedom of movement and comfort, including in a far-reclined posture; natural relief for muscles/and intervertebral discs

---

### Backrest

- > 2 backrest heights with integrated, lumbar support height and depth adjustment

- > Optimal pressure distribution when you lean back; curvature of the lumbar support optimally adjustable for height and depth

---

### Seat

- > Soft upholstery with multi-layer design, made of foam and cushioning nonwoven; 2 different sizes
- > Seat height adjustment (patented Sedo-Lift mechanism)

- > Seat moulds itself to your body’s contours, ensuring excellent long-term comfort
- > Durable, wear-free mechanism; full impact absorption of body weight even in the lowest sitting position; no jarring of the spinal column

---

### Armrests

- > Controls for lumbar support adjustment integrated in the armrests

- > Scarcely visible; intuitively correct gripping and operation of the lumbar support adjustment

---

### Headrest

- > Height-adjustable headrest, leather-covered and soft upholstery

- > Supports neck muscles when upper body is far reclined, a comfortable sitting-lying posture is possible
-

**Characteristics**

my way is the decision to part with convention.

Its extravagant form makes it the number one choice for every situation where personality, leadership and sending a message matter.

The hidden virtues of my way are no less impressive.

Luxurious upholstery, first-class attention to detail and high-quality materials make this chair not only visually stunning, but also an ergonomic and functional pleasure.

A pleasure that its owner can share in style with others:

my way comes as a swivel chair and as a conference swivel chair.

**my way product family**

Swivel chair, conference swivel chair

## Features

## Benefits

---

### Seat mechanism

- > “Similar” mechanism (32° opening angle) moves in synchronism with your body; optional seat tilt adjustment (4°)

- > Maximum freedom of movement and comfort; natural relief for muscles/vertebrae; activates the natural metabolic processes

---

### Backrest

- > Generously proportioned, well-upholstered backrest; all-round frame made of PUR protects the upholstery from wear
- > Backrest with integrated height and depth-adjustable Schukra lumbar support

- > Suitable for individuals weighing up to 200 kg, even during 24 h shift operation; perfectly integrated control elements make it extremely easy to find the ideal setting for the user’s height and weight intuitively
- > Optimal pressure distribution when you lean back

---

### Seat

- > Anatomically formed with seat hollow and rising hip guide
- > Seat height adjustment (patented Sedo-Lift mechanism)
- > Patented depth adjustment (60 mm adjustment range)
- > Thickly upholstered seat cushion with all-round edge protection

- > Always a correct sitting posture and a secure support for dynamic sitting; no unconscious sliding forward; correct hip posture
- > Durable, wear-free mechanism; full impact absorption of body weight even in the lowest sitting position; no jarring of the spinal column
- > Excellent sitting comfort whatever your height; seat always correctly positioned in relation to the backrest
- > For durability and extreme continuous loading, as is customary in 24 h shift operation

---

### Armrests

- > Robust armrests, 3D adjustable, lockable in every position

- > Optimal forearm support; helps prevent tension in the shoulder and arm muscles

---

### Headrest

- > Functional headrest

- > For optimal comfort when leaning back and to ease the pressure on the neck muscles, including in a far-reclined posture
-

**Characteristics**

Nothing gets the better of mr. 24 – not even a body weight of 200 kg. The chair has been designed for the most extreme round the clock continuous loading conditions typical of 3-shift 24 h operation, e.g., in control and monitoring rooms.

Ergonomics, material quality, mechanical durability, sitting comfort: all factors comply with the highest quality standards.

This makes mr. 24 a true safety factor for such workstations.
