

black dot

sedus

Self-confident. Proud. Intelligent. Sedus black dot is a family of swivel chairs and conference chairs. The swivel chairs are the creation of Michael Kläsener; the conference chairs were designed by Stephan A. Preisig. Quality that lasts plus sophisticated design – combined with a whole range of features. Maximum mobility, thanks to innovative technology like the dorsokinetic mechanism, makes these chairs unique. Freedom of movement is an essential aid to creative thinking. In a new office culture. Offering a new work experience.

Self-confident. Proud. Intelligent: **Place 2.5**

A chair that is as individual as you yourself. Whether mobile or static, it is always comfortable. Sedus black dot's many features enable it to adapt to every office situation, while its modern, fresh look lends any room special flair.

Dorsokinetic mechanism. The backrest is connected to its support by a flexible joint, thus ensuring absolute freedom of movement: not only forwards and backwards, but also to either side. The backrest follows every movement of your body, giving you optimum support.

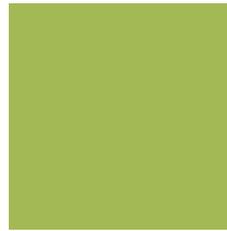

Upholstery. The skilfully finished upholstery underlines the high quality of this chair. The seat and backrest are made of breathable material at the sides to ensure an extra-pleasant seat climate.

Lumbar support
The height-adjustable lumbar support is easy to use and guarantees an ideal sitting position. The integrated forward curvature of the backrest provides optimum support for the spinal column.

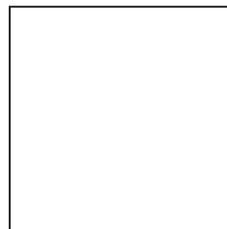

“Similar” mechanism.
The particularly large opening angle of 32 degrees guarantees outstanding sitting comfort and encourages dynamic sitting.

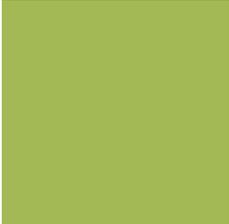

Sliding seat The depth of the patented sliding seat can be adjusted by 60 mm. The seat surface can be made smaller or larger according to your preference and the length of your legs. The correct relationship between seat and backrest is maintained whatever the setting so that

your back retains secure contact with the cushion.
Seat tilt. In addition, the extremely fine adjustment of the seat tilt between 0° and 4° permits sitting comfort perfectly adapted to each individual user.

Sedo-Lift mechanism
Even in the lowest sitting position, this patented seat height adjustment completely cushions your body weight, thus providing effective protection against jarring of the spinal column.

Height-adjustable
basic armrests (also
available in a 2D version
with depth adjustment)

Swivel chair with high backrest, 3D adjustable armrests, polished aluminium base

Swivel chair with normal backrest, height-adjustable armrests, black aluminium base
