Sedus high end

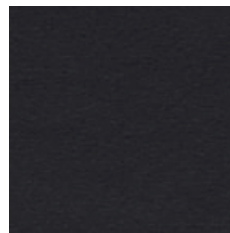

high end is an innovative table system which meets the ever-changing needs of corporate communication at the highest level. The key concept behind this design from Prof. Wulf Schneider and his partners was to create an aesthetic table system for senior executives, which could be converted into various configurations within just a few minutes.

Top: The table tops are available in a wide selection of finishes, including real wood veneer, laminate and linoleum. The high-quality frames are made of polished aluminium or are powder-coated in white or black aluminium.

Bottom: All the leg pairs are fitted with height-adjustable tilting glides.

The recyclability, quality and timeless design of our products are a key part of the environmental protection philosophy at Sedus.

www.sedus.com

The table top and cross-rail leg frames can be connected and disconnected quickly and without the need for tools, simply by using the twist lock.

high end system design

Easy-assembly cross-rails, an aluminium frame and floating table top are the characteristic features of high end. Whether as rectangular tables, boat-shaped or modular systems: high end furnishes every conceivable room layout and is available in three system depths – 900, 1,050 or 1,200 mm – each with depth-adjusted leg pairs.
