

mr. charm

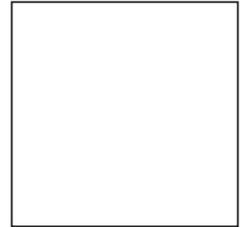

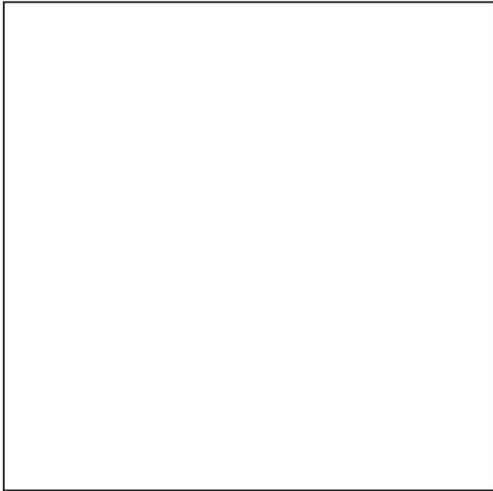

sedus

In whichever position you work – you are sure to look good.

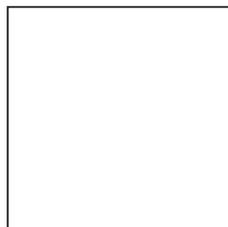

Whether you prefer to work in a standing, sitting or reclining position, mr. charm sets standards in ergonomics, design and comfort. With its wide-ranging combinations of features, the versatile office seating programme meets all expectations and demands – from the clerical desk to the boardroom. For a new emotional office culture: **Place 2.5**

“Similar” mechanism

The spacious opening angle of up to 32° promotes dynamic sitting in a particularly efficient manner. The backrest pressure is individually adjustable and the seat can be inclined forwards by 4°, if desired.

Tested and recommended The recyclability, quality and timeless design of our products are a key part of the environmental protection philosophy at Sedus.

Lumbar support

A lumbar support has been integrated into the mr. charm height-adjustable backrest to lend ideal support to the lower back. In addition, a pneumatic cushion allows the curvature to be individually adjusted.

3D armrests

The armrests can be adjusted in any direction required. With the capacity to turn the full 360°, even more adjustments can be made, guaranteeing maximum freedom of movement.

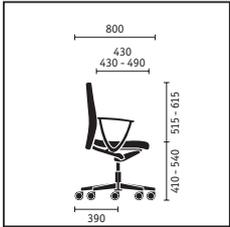

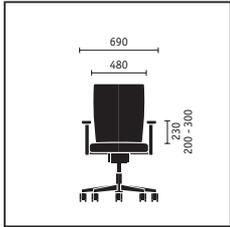

Sliding seat

The seat depth can be altered by 60 mm, while the seat hollow remains correctly positioned in relation to the backrest. This principle, patented by Sedus, guarantees proper hip support for the user.

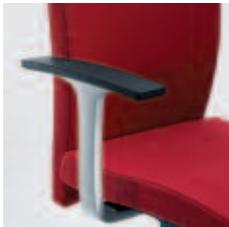

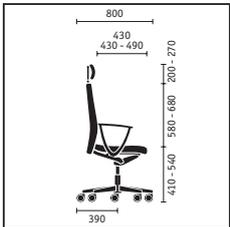

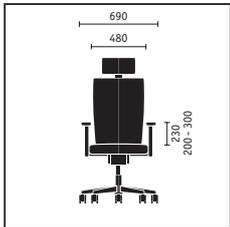

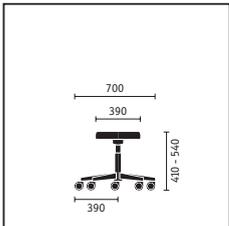

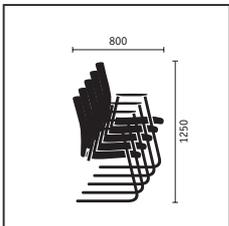

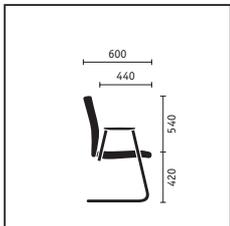

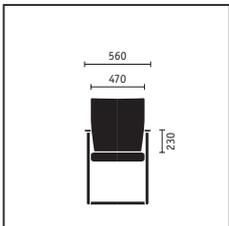

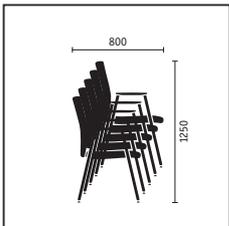

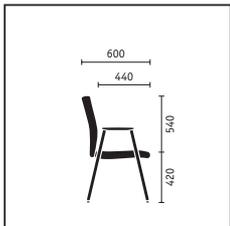

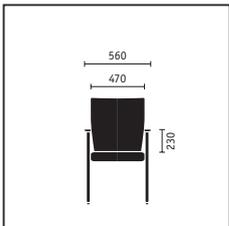

Swivel chair with normal backrest

Swivel chair with high backrest and functional headrest

Basic armrests,
3D armrests,
Aluminium armrests
